

## Enterprise Integration Developer Roles

---

### General Overview

Brooke supports clients to tackle their most complex digital transformation needs. Many of our customers have complex system integration challenges amidst their business transformation needs, especially as they focus on becoming more customer-centric. For some this is a matter of evolution, for others it's a matter of survival.

We're looking for more than just good system integrators and developers to solve these challenges. We're looking for great people who can genuinely influence, direct and deliver the very best possible ROI for our customers. We aim to be our clients' trusted partner for their transformation journeys and all team members have an important role to play.

### Developer Role: Minimum 2 years' experience in system integration development required

#### In the first 3 months

- Delivery: Under the leadership of the Enterprise Architecture and Integration practice lead and consultants, develop solutions for client integration challenges. Deliver integration development work for clients in line with project plans and agreed deliverables. The majority of this work will be performed onsite with clients.
- Relationships: Form important working relationships with the key people within Brooke, and with our platform partner MuleSoft, that will help you achieve success in your role. These are all wonderful, intelligent people who share a strong focus on differentiating and winning in the market.
- Approach: Understand the "Brooke Way" and deliver quality outcomes for our clients. We place a lot of emphasis on the Brooke Way as our differentiator in winning and delivering work.
- Sales Support: Under guidance from colleagues, assist the Sales team on occasion to complete technical responses as part of the preparation of tenders and proposals. You may need to provide some technical customer support.
- Certifications and Training: To be successful in the role, you will need to be (or be supported on the path to become) a certified expert in the MuleSoft AnyPoint Integration platform. You will maintain certification while keeping abreast of the latest enterprise technologies and applications that influence the integration landscape.

#### Ongoing Role

- Delivering integration development work for clients to support the creation of the shared success stories for which Brooke is renowned.
- As a developer, you'll be involved in mentoring junior developers and may also contribute to the Brooke Academy's MuleSoft training practice.
- As a part of the channel partner team with MuleSoft, you'll support evaluation of the toolkits and training we need to be successful with our customers.
- You may be involved in ongoing Sales and Marketing support for events, tenders and proposals to help in enhancing Brooke's reputation as a leader in Business and IT transformations.

If this sounds like you, we would love to have a chat about opportunities in our team. To apply, send your resume to [confidential@brooke.global](mailto:confidential@brooke.global).
